

MALLA REDDY ENGINEERING COLLEGE FOR WOMEN

Autonomous Institution-UGC, Govt. of India

Accredited by NAAC with 'A+' Grade, UGC, Govt. of India | Programmes Accredited by NBA National

Ranking by NIRF Innovation-Rank band(20-300),MHRD,Govt. of India

Approved by AICTE, Affiliated to JNTUH,ISO 9001-2015 Certified Institution

DEPARTMENT: CSE-DS	COURSE: IV B.TECH II SEM	SUBJECT: CS
	R22 REGULATION	2025-2026

ASSIGNMENT SHEET-1

SET-1

S. no	Question	CO	PO	BTL
1	Explain the difference between cloud delivery models and cloud deployment models with suitable examples.	CO1	PO1	2
2	Describe the key objectives of cloud information security and explain how they support secure cloud service delivery.	CO1	PO1	2
3	Discuss the importance of cloud security services in protecting applications, users, and infrastructure.	CO2	PO2	3
4	Compare traditional information system security fundamentals with cloud software security fundamentals.	CO2	PO1	4
5	Analyze the role of the CIA triad in cloud security and explain how it applies in a cloud environment.	CO3	PO3	4

SET-2

S. no	Question	CO	PO	BTL
1	Explain the essential design principles that should be followed while developing secure cloud software systems.	CO1	PO1	2
2	Discuss how secure cloud software requirement engineering contributes to secure application development.	CO2	PO1	3
3	Explain how cloud security policies are translated into implementation procedures in real-time environments.	CO2	PO2	4
4	Describe the importance of secure cloud software testing before deployment.	CO3	PO1	3
5	Evaluate the need and purpose of cloud penetration testing with a suitable example.	CO3	PO3	5

SET-3

S. no	Question	CO	PO	BTL
1	Describe various cloud delivery models and explain their role in providing services to users.	CO1	PO1	2
2	Explain different cloud deployment models and identify where each model is generally applied.	CO1	PO1	2
3	Discuss the objectives of cloud information security and relate them to enterprise security goals.	CO2	PO2	3
4	Compare cloud-based security architecture fundamentals with traditional security frameworks.	CO2	PO1	4
5	Analyze privacy and compliance risks involved in cloud environments using a real-time scenario.	CO3	PO3	5

SET-4

S. no	Question	CO	PO	BTL
1	Explain how secure design principles support secure cloud application development.	CO1	PO1	2
2	Describe the process of gathering secure cloud software requirements.	CO2	PO1	3
3	Explain the importance of implementing cloud security policies across all layers of the system.	CO2	PO2	4
4	Discuss the importance of secure cloud software testing and vulnerability detection.	CO3	PO1	3
5	Examine common threats and vulnerabilities in cloud computing environments.	CO3	PO3	5

SET-5

S. no	Question	CO	PO	BTL
1	Explain cloud delivery models and highlight their benefits to organizations.	CO1	PO1	2
2	Describe cloud deployment models and compare them based on security requirements.	CO1	PO1	2
3	Discuss cloud information security objectives in the context of enterprise cloud adoption.	CO2	PO2	3
4	Compare cloud security service fundamentals with traditional on-premise security service models.	CO2	PO1	4
5	Discuss challenges related to cloud access control mechanisms.	CO3	PO2	4

SET-6

S. no	Question	CO	PO	BTL
1	Explain the role of cloud security design principles in protecting cloud-based applications.	CO1	PO1	2
2	Describe approaches used in secure cloud software requirement engineering.	CO2	PO1	3
3	Explain cloud security policy decomposition and its importance in implementation.	CO2	PO2	4
4	Describe the role of cloud penetration testing in ensuring application and infrastructure security.	CO3	PO1	3
5	Analyze how weaknesses in identity and access control affect cloud security.	CO3	PO3	5
