

MALLA REDDY ENGINEERING COLLEGE FOR WOMEN

Autonomous Institution-UGC, Govt. of India

Accredited by NAAC with 'A+' Grade, UGC, Govt. of India | Programmes Accredited by NBA

National Ranking by NIRF Innovation-Rank band(20-300),MHRD,Govt. of India

Approved by AICTE, Affiliated to JNTUH,ISO 9001-2015 Certified Institution

DEPARTMENT: CSE-DS	COURSE: IV B.TECH II SEM	SUBJECT: CS
	R22 REGULATION	2025-2026

ASSIGNMENT SHEET-2

SET-1

Q.No	Question	CO	PO	BTL
1	Explain the major risks associated with relying on cloud service providers and how they affect customer operations.	CO2	PO2	3
2	Discuss how shared responsibility affects risk distribution between cloud provider and customer.	CO3	PO3	4
3	Describe the purpose of implementing cloud security policies in enterprise environments.	CO2	PO1	3
4	Explain the role of CSIRT during a cloud-based cyber security incident.	CO2	PO2	4
5	Discuss the importance of identity management and access control in cloud security architecture.	CO3	PO3	5

SET-2

Q.No	Question	CO	PO	BTL
1	Explain cloud service provider risk factors such as data dependency and vendor lock-in.	CO2	PO2	3
2	Analyze the business impact when a cloud provider experiences a service outage.	CO3	PO3	4
3	Describe different types of cloud security policies used in organizations.	CO2	PO1	3
4	Discuss the functions and importance of CSIRT in managing cloud incidents.	CO2	PO2	4
5	Explain trusted cloud computing and its importance in secure system design.	CO3	PO3	5

SET-3

Q.No	Question	CO	PO	BTL
1	Explain how cloud provider risks can influence compliance and regulatory obligations.	CO2	PO2	3
2	Discuss strategies organizations can use to mitigate provider-related risks.	CO3	PO3	4
3	Explain why security policy implementation is necessary for cloud environments.	CO2	PO1	3
4	Describe VM security recommendations for protecting virtualized workloads.	CO3	PO2	4
5	Discuss secure execution environments and their role in cloud security design.	CO3	PO3	5

SET-4

Q.No	Question	CO	PO	BTL
1	Describe the risks customers face when relying on third-party cloud service providers.	CO2	PO2	3
2	Explain how cloud service contracts influence security risk responsibility.	CO3	PO3	4
3	Discuss different types of policy frameworks used in cloud infrastructures.	CO2	PO1	3
4	Explain the purpose and activities of a Computer Security Incident Response Team (CSIRT).	CO2	PO2	4
5	Describe how security architecture and design patterns help ensure secure cloud deployments.	CO3	PO3	5

SET-5

Q.No	Question	CO	PO	BTL
1	Explain operational risks associated with cloud service provider dependency.	CO2	PO2	3
2	Analyze the impact of cloud provider security breaches on client organizations.	CO3	PO3	4
3	Explain the role of organizational security policies in ensuring secure cloud usage.	CO2	PO1	3
4	Discuss the need for VM-level security controls in multi-tenant cloud platforms.	CO3	PO2	4
5	Explain architectural considerations involved in designing secure cloud systems.	CO3	PO3	5

SET-6

Q.No	Question	CO	PO	BTL
1	Describe key cloud service provider risk categories such as data loss and dependency risk.	CO2	PO2	3
2	Discuss methods organizations can adopt to manage and reduce provider-related risks.	CO3	PO3	4
3	Explain different types of cloud security policies and their enforcement mechanisms.	CO2	PO1	3
4	Describe incident handling procedures followed by CSIRT in cloud environments.	CO2	PO2	4
5	Discuss the role of identity and access management within cloud security architecture.	CO3	PO3	5
